

CVE-81 EXP

Built tough for tough duty

QCEC's CVE-81 explosion-proof, refrigerated, composite, automatic sampler will handle hazardous duty in Class I, Group D and Class II, Groups E, F and G hazardous locations. It features electromechanical controls, including programmable timed-interval control with contact closure, automatic pre- and post-intake line purge, on/off switch and manual push button. The controls are mounted inside an explosion proof control box located on top of the enamel-coated steel refrigerated cabinet.

The CVE-81 EXP relies on QCEC's proven durable vacuum/pressure pump technology and a **two-year warranty** is standard.

CVE-81 EXP standard equipment:

- Explosion-proof control system
- Explosion-proof, industrial grade enamel steel construction, 6.0 cf refrigeration unit
- 50-500 ml adjustable sample chamber
- Heavy-duty diaphragm vacuum pump
- 20' $\frac{3}{8}$ " ID intake tubing
- 5-gallon polyethylene composite container
- 110V operation
- Explosion-proof manual push button
- Explosion-proof on/off switch
- Automatic pre- and post-purge
- Programmable timed interval/contact integrator
